NO MATTER HOW YOU SPIN YOUR RECORDS

THE MOONRIVER MODEL 505 PHONO PREAMPLIFIER

The Moonriver Audio 505 phono stage features 4 inputs for all your turntables, tonerarms or cartridges. It supports every possible adjustment with dedicated knobs and switches to ideally match your precious MC or MM cartridge. It also saves your settings for each individual input. Ultra low noise, active, hybrid solid state circuit delivers incredible performance with open, transparent and dynamic sound. It is designed with audiophiles, record collectors and vinyl freaks in mind. All these colorful nuances, forgotten melodies and low level sounds that are lying hidden deep in the black, tiny grooves of new and old 33, 45 and 78 rpm records, will be revealed effortlessly. Sustainability, reliability and repairability are also included. Keep music alive!
